

# Project Spotlight

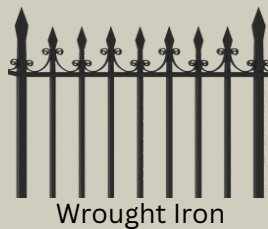

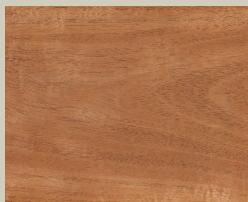

## Backyard Oasis

We are excited to share a recent project we completed in collaboration with Cantrell Custom Pools. This backyard transformation was a comprehensive endeavor where we were hired to design the entire space. The project included various elements to create a cohesive and luxurious outdoor living area. Notably, the homeowner's father contributed to the construction by building the pool house and pergola, adding a personal touch to the project.

The homeowner had a clear vision and selected the materials for the project, aiming to incorporate numerous details to enhance their outdoor experience. Their wishlist included elements like turf, a spacious pool house, a stylish pergola, and a wet deck for lounging and relaxation. The combination of these features resulted in a stunning backyard oasis that perfectly blends functionality and aesthetics.

Cedar

Wrought Iron

89 Limestone  
Washed Concrete

Blue Ice Coping

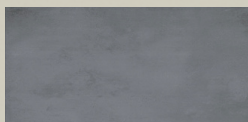

Boxwood

Turf

Dark Grey Plaster

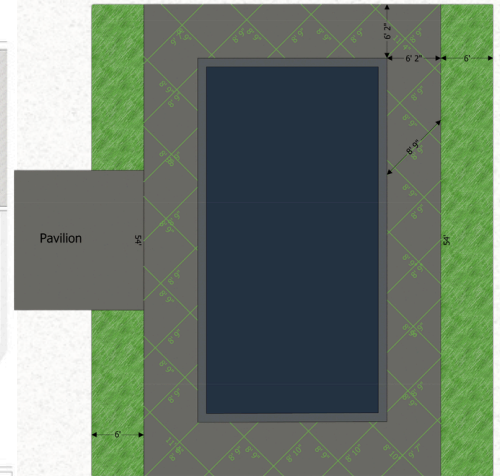

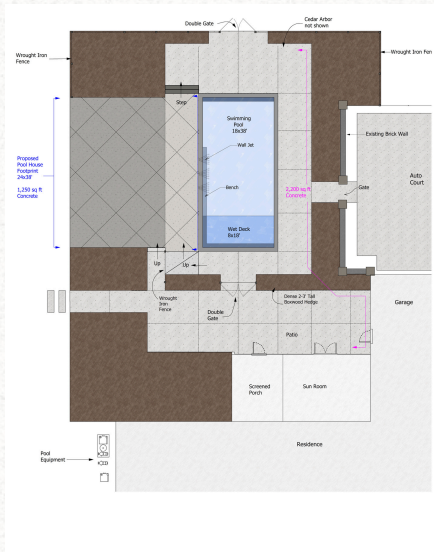

Rose
